Add a false base to your planters!

Each of our taller planters, typically those over 600mm, can be specified with an integral polystyrene false base, at any height, but usually at 40 – 45cm down from the lip, to create the perfect sized planting pocket.

BESPOKE PROJECTS

A wealth of design & manufacturing expertise is used to turn ideas and drawings into the end product.

We can develop your ideas from the design stage right through to the finished product, giving you a quality solution for any of your requirements.

Give us a call to discuss **your needs**.

BENEFITS

All of our planters are manufactured using GRP – also known as 'fibreglass'. This means every one of our planter's benefits from the many inherent material characteristics that fibreglass has to offer including:

- **Extremely lightweight and easy to transport**
- **Shatterproof and Incredibly durable**
- **Suitable for both interior and exterior projects**
- **Waterproof, Frost proof and UV resistant**
- **Require very little or no maintenance as they do not rust or rot**
- **Hundreds of colours and finishes available to suit any environment**

DESIGN

Our expanding range of hand made GRP planters are all designed and manufactured in-house with specific consideration in terms of their character, finish and visual impact.

MISSION

Our aim has been clear from the start at Opus; **to create elegant, stylish and well designed products that can be used to present nature in a present day interior or exterior landscape.**

We are excited about the future here at Opus Planters as we plan to build lasting relationships with our customers. We intend to do this by supplying them with quality, stylish and exclusive products that are ready or delivered on time and at an affordable price.

FINISH

Most of our GRP Planters are gel-coated in their moulds with a choice of *high gloss or matt* finishes available in any BS4800 or RAL colour, that's over 300 colours!

Or simply choose from our standard range of colours on the chart.

QUALITY PROMISE

We understand the importance of total product integrity here at Opus planters. We employ strong quality control procedures designed to encourage consistency and efficiency throughout the manufacturing process, this enables us to dispatch our products from the factory confident that they are to customer's specification.

"The Opus Planters that I have received are amazing as artwork. They will lift up any area with the right choice of colour I highly recommend Opus Planters to anyone."

Uri Geller

“We are committed to supplying the landscaping industry with quality, well-designed and stylish planters”
